

Potty Training Incentive Chart

Visual Incentive Chart for
Early Childhood or Students
with Special Needs

Created By: Melissa Toth Finch

Bathroom Chart

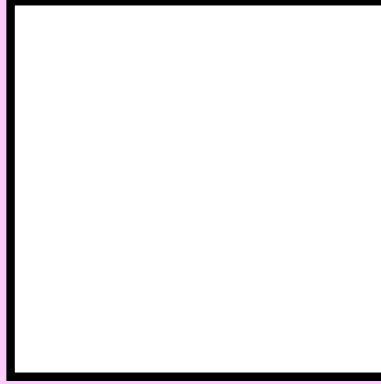

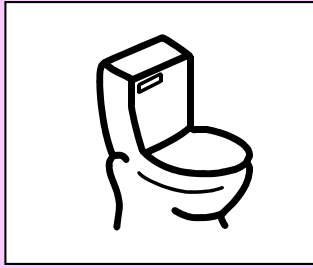

Toilet Training is a HUGE task. It is also a huge milestone achievement for any student, staff member or parent. I have found that sometimes it can seem to be a near impossible task.

I have created these incentive charts to motivate children to become successful in using the restroom.

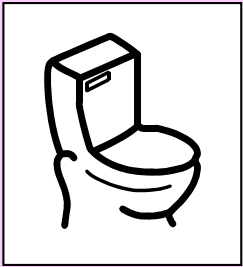

Simply print, laminate and attach velcro to the reinforcement square. Using a dry erase marker cross off each toilet when the child successfully uses the toilet. Earn enough-reward with a highly motivating reward! Start with one of the smaller charts. Start with 1 or 2 toilets first to earn a reward. Set the child up for success. Gradually increase the amount of times they must be successful to earn their reward!

GOOD LUCK :)
